Detectives Desk: 201-547-5066
East District: 201-547-5408
365 summit ave — address to courthouse to bring police report to file charges

10/26/21 -- Received threatening communication from a group of women I have never communicated with and it is not the first time. I have received threatening messages to **“Go back to Howard”** after moving to New Jersey. She and her friends began stalking me in Pittsburgh, Greenville, Columbus, Los Angeles, Howard, and now Jersey City. I am not sure but I believe the woman is Emma Chamberlain. I also believe Aubrey Plaza to be involved in this incident as well. Most of the stalking is cyberstalking and geared towards psychological harassment, harassing communication also, but I believe it also manifests into physical stalking as well. Some of these women communicated things like **“I raped you with Zuckerberg, I fucking raped you”**. Some of the other things communicated:

“I want you dead to me”,
“You're a crackhead”,
“You're a pig”,
“You raped a girl”

There are some other women involved in the harassment and stalking as well, and it has been different over the last 11 months, but I'm pretty sure they all know each other and have obviously been purposefully doing it for almost a year now.

10/27/21 -- The Zuckerberg family knew what the group of women were up to the day before and began harassing me the next morning by means of electronic communication, hacking, psychological harassment, stalking, etc. I believe they organized the means for the women to begin harassing me in the first place and are trying to cover up for the ongoing harassment from the women above, as well as the fact that it is now clearly evident who is responsible for it. It is consistent with ongoing psychological harassment and stalking that I believe they have roped other friends and family members into as well. Some of the other things communicated:

“you're a roach”,
“you're a fucking loser”,
“you're a rapey fucking loser”,

A lot of the stalking and harassment is electronic in nature, text, voice, cyberstalking online, psychological harassment, but I believe there is a physical element as well having heard and seen some of them around various places I have lived. I believe these individuals not only threaten my well being, my work, my family, but my actual life as well and I truly believe they have attempted to take my life in more ways than one. I believe he has put extraordinary effort into actively monitoring me via an illegal system composed of computers, hacking, gps, etc. I felt

so unsafe by the events of the last few months that I had to deactivate and delete my Facebook account, because I was being harassed based on individuals that I was still in contact with from my previous job (who were aware of the harassment and stalking that was taking place) where I was forced to leave due to ongoing stalking and psychological harassment and it clearly is not a safe platform for me to use with my ongoing privacy concerns.

I believe the above is a result of an ongoing stalking and harassment issue that I have had with the Zuckerberg family, specifically Mark and Arielle. I believe Mark's wife, Priscilla Chan took part in the same harassment in Columbus which led to me moving out of my apartment and moving to New Jersey, and the same form of harassment I have been dealing with from the group of women mentioned above. They communicated to me that they had tried to frame and kill me several times now. It was harassment from the women mentioned above, as well as the family mentioned that has made me move over 4 times in the last calendar year. The harassment in Columbus was non-stop, geared towards my friends, my work, my family, and made it impossible to have any moments of peace or take time for myself. It's more than stalking, it's a psychotic obsession over everything in my life from the individuals involved.

All mentioned parties have not only forced me to move four times in the last year but also harassed and stalked me so badly that I was forced to quit my previous three jobs, and I believe they are also attempting to force me out of my current job as well. A lot of the harassment centers around my work and happens as I am trying to work, but it also is very directed at my personal life and family as well.

Some other things communicated by the general group of people stalking and harassing me:

"Hired a hitman"

11/2 - 11/29 -- I filed a police report about the first week of events that occurred after moving to jersey city, and after someone obviously had found out about the police report began receiving threats such as:

"It's so fucked up what's going to happen to you"

"Shut up"

"Prove it"

"Loser"

"You have two weeks to live"

"We're not leaving until you're dead in a ditch"

"I hope you're ass raped in prison"

"I will bury you"

"I'm going to make you bisexual"

"We have you on camera masturbating"

"Pervert"

"Horny around children"

"If you can't afford medical care, close your fucking mouth Cody"

“You remind me of a pedophile”

“I want your mom and dad together for Christmas this year so that it is nothing but rape and torture”

“You were a rapey loser in Howard”

“You were a rapey loser in Columbus”

“You were a rapey loser in Pittsburgh”

“Jersey City is for rapey losers”

“I want you locked in your mother’s basement”

“You’re pathetic”

“You haven’t been in pussy since the day you came out one”

“I will have you arrested if you walk in my direction”

“We fuck with you because your dad’s a pedophile”

When the harassment and stalking started to get severe again almost 12 months ago I actually moved to Greer, SC with a friend who ran a border collie foster. One of the dogs we took care of was named “Shelby” and even moving that far away from where the harassment started again to begin with I was forced to move from South Carolina because of the same exact structured attempt to psychologically / emotionally / mentally harass people was used as detailed above just in the last month that I moved to Jersey City. The people involved in the stalking and harassment then, are certainly taking part in it now and are leaving me messages periodically calling me **“Shelby”** because she was a perfect dog, just a little strange maybe, but also because the same exact thing started here in Jersey City that took place when I moved to South Carolina. The same accusations, the same threats, if not more severe this time around, but truthfully it never really stopped even after moving from South Carolina it just grew a little less frequent maybe, but not even that. But yeah same point, a group of people stalking me and harassing me that I do not know, were so creepy they took the time to find out what my friend’s dog name was and then began referring to me as his dog’s name when they began communicating different threats and forms of harassment to me again. And lastly, I do not think it is just one person communicating the **“Shelby...”** messages to me. I believe it is a few different people if not only the people listed above, people associated with them as well.

I also have been sporadically receiving messages about different women that have been in my life from the people stalking and harassing me. Just saying their names, or random things they have found out about them from stalking them and myself. Some of the people they are obsessed with and stalking are: Catherine Brach, Haley Bower, Coral Lee, Deepshri Mathur, Taylor Gleason. Haley is a friend from college, and I often get messages saying things like **“What happened with Haley Bower?”**, **“When did you first meet Haley Bower”**, **“How do you know Haley Bower”**, **“You raped Haley Bower”**, or **“You raped a girl at Denison”**, or **“You raped a girl from Howard”**, or **“Stay away from her she is nothing but trouble”**, or **“She is dead to you”**. With Coral Lee who is one of my ex-girlfriends it was **“Her life is off limits to you”** or **“You’re nothing but a loser to her”**, or that **“You’re a pig”**. With Catherine Brach who was my neighbor at one point it was always something associated with being a **“Pervert”**, or **“Think Catherine’s bedroom”**, or messages about how **“She liked being spanked”**, or **“Catherine fucked everybody”**. With Deepshri Mathur it was **“You butt fucked**

her", or **"Grow up"**, or **"You are a rapey loser"**, or **"How embarrassing"**. I believe they have also been stalking acquaintances I went to school with that are women such as Jennifer Nguyen, Jennifer Lee and have communicated strange things about them on and off. In regards to Jen Nguen it was **"She's single bb"**, which was weird because she and one of my best friends have been dating for like 6 or 7 years. Or that **"[Jen Nguyen] has a vagina that opens"**. A lot of the communication I have come to notice is just about an obsession / sexualization of women in general, such as one day while I was working from home received a message from one of the people harassing me just saying **"For Vina Sky"** who is some random pornstar.

Some of the people involved in the harassment / ongoing physical & cyber stalking:

Emma Chamberlain
Aubrey Plaza
Audrey Nuna
Alana Nguyen
Arielle Zuckerberg
Mark Zuckerberg
Sundar Pichai
Emily Coutts
Priscilla Chan
Katie Sharkey?
Scott Martin?

11/14/21 -- Pretty new to the city, and went on a first date a few weeks ago as well and during the date started receiving threatening / harassing messages while at dinner to **"Give it up"**, **"Go home"**, **"Grow the fuck up"**, and that I was **"A pig"**, or that **"She's a dud"**, and **"Never come back to midtown"**.

11/30/21 -- After almost a month straight of receiving threatening messages from all the parties listed above I was hospitalized by the Zuckerberg family for the second time in the last calendar year when I started having shooting pains up and down my body, my heart felt like it was going to explode, and the threatening communications were non-stop. Before I went to the hospital they were leaving messages like **"you're gonna need it [help]"**.

12/1/21 - 12/7/21 -- Some of the other messages received were:

"You're an addict"
"You're addicted to Xanax"
"You're addicted to Adderall"
"Coke is for rapey losers"
"Heroin is for rapey losers"
"Faggot"
"You have a teeny tiny dick"
"Fat ass"

“Trailer trash”
“Lose a couple pounds”
“You sexually assaulted children”
“Another hospital visit is in your future”
“You are physically not capable of finding a woman”
“You are mentally challenged”
“I will have you fired”
“Leave Jersey City and never come back”
“You are making pennies while I am making all that paper”
“Do you want to know what your family does in their freetime? Rape.”
“Give it up”
“Go home”
“Poser”
“Con artist”
“Grow up”
“Grow the fuck up”
“Grow up a little”
“Your stomach is undesirable”
“Get a life”
“Get a grip”
“Look it up, you have a mental condition, it’s called paranoid Schizophrenia”
“Stay the fuck off of Hinge, you’re not dating in this city”
“You’re never coming back from this”
“If you’re not going to date, we will not let you stay here [in Jersey City]”
“You shouldn’t spend time with your nephew because your dads a pedophile”
“You should fake your death because there are people trying to kill you”
“This is the life you wanted, this is the life you dreamed of in your mothers basement” —
referring to the ongoing harassment and threats I receive constantly from the people involved.
“Don’t you get it? You’re a pedophile in New York City”
“Adderall makes you a rapey loser” -- a medication I am prescribed that they somehow have stalked me and discovered I take.
“Xanax is for rapey losers” a medication I am prescribed that they somehow have stalked me and discovered I take.
“You’re a rapey loser when you’re drunk” -- never ever even met any of the people listed stalking me in the document sending these messages in my life.
“You’re a rapey loser when you’re high” -- which sometimes I smoke / take recreationally and have stalked me to find out that I do.
“If you ever move to LA I have virtual prisons built for you. Any gym you go to I am going to play ‘Rapey Loser’ on repeat through your headphones the entire time”.

They also have been leaving messages about my coworkers that I believe they have also been stalking, calling my boss Aaron Baker a **“Rapey loser”**. And also began communicating other strange things about a woman that I work with as well, Mercedes Alonzo. And usually during the work day on and off they start trying to communicate & psychologically harass me with rambling

messages that are on the threatening side as a means to make it harder to work and break my concentration. It happens during meetings with my coworkers as well, which is when they started communicating that my boss was a **“Rapey loser”** etc.

Additionally, I receive a lot of mocking communication about my family members such as my mother, brother, sister-in-law, and nephew as well. With harassing communication even continuing when I’m spending time with them in person or even just calling / FaceTiming them. Some of the communication also happens when I’m at family functions around children or even with just my own immediate family which is when they began communicating things like **“You shouldn’t be able to spend time with your nephew because you’re a pedophile”** or **“You remind me of a pedophile”**, or just generally threatening me to stay away from children in my family.

Also, I have been receiving threatening messages and being electronically harassed while trying to work out at the gym, the same kind of communication from the same group of people. Things like **“I’m going to fucking own you”**, **“You haven’t been in pussy since the day you came out one”**, **“The headache coming your way”**, and **“Crackhead”**. I believe that this is also where the threat of harassing me at the gym came from when I receive a message saying, **“If you ever move to LA I have virtual prisons built for you. Any gym you go to I am going to play ‘Rapey Loser’ on repeat through your headphones the entire time”**. I also received communication while at the gym along the lines of **“I’m watching you”**.

A lot of times when I’m around women they start to communicate strange things and sexualize everything that they are communicating, most of it is threatening communication to get a girlfriend or they will **“Kill you [me] in Jersey City”** or force me to leave the city by continuing with the ongoing forms of harassment that they have been using, or that I’m **“too much of a rapey loser”** to have a woman in my life — obviously other forms of stalking and harassment going on. Even just hanging out with new friends some of the strange things communicated were like **“You’re a turd”**, **“Grow up”**, **“Rapey loser”**.

Some of the other things communicated:

“Don’t ever come back to San Francisco or this will happen all over again”

“Fuck you”

“I fucked you up”

“I will fuck you up”

“Don’t ever come back to California or this will happen all over again”

“Apollo’s never going to launch” -referring to the startup that I currently work at full time.

Due to the ongoing harassment I have had to be hospitalized on two occasions in the last year and have had to move countless times due to the severity of the situation. For someone like myself it is beyond expensive and financially draining only to receive messages from the people responsible saying things like **“You make pennies and I’m making all that paper”**. At this point in time, just in the last calendar year I would say it has cost me at least \$10,000 dollars to

continue with receiving medical treatment, therapy from the harassment, as well as the moving expenses involved with it occurring continuously. This is not including the most recent hospital visit where I was admitted due to the ongoing stalking and harassment and was charged over \$13,000.

12/8/21 -- Due to all the threats, stalking, and harassment I thought it would be best if I deleted my social media accounts, because it can be an easy tool for stalking people and I did not want to be giving away details about my life to strangers trying to hurt you. While deactivating my last social media account I quickly scanned for my linkedin to make sure it was deleted and saw that someone involved with the threats and stalking documented above (I can only imagine) made a fake LinkedIn profile of myself (Cody Wirth) listing me as living in Howard, OH (where my family lives and where I stay from time to time, saying I worked at a company called "Mr." for "Cody inc." It is an extremely small town, there are no other Cody Wirths and it definitely is not a coincidence.

12/8/21 - Some of the other messages received were:

"You're embarrassing yourself by going to the police"

"Leave this city before I kill you"

"HIV"

"Fuck you"

12/9/21 - Some of the other messages received were:

"Go to a mental hospital"

"You're rapey and you know it"

"We've got a pathetic loser over here"
